Work Experience Job Description

KOUZARIDES LAB

About the Gurdon Institute

The Gurdon Institute is a world-leading centre for research into the biology of development and how normal growth and maintenance can go wrong in diseases such as cancer. Many of our scientists have made pioneering contributions to the fields of basic cell biology, cellular reprogramming, epigenetics, and DNA repair.

Dates of Placement

9 July – 13 July

Placement Description

Area of the Gurdon Laboratory Research

General topic area RNA modifications, RNA modifying enzymes, cancer

About the team Our group is investigating RNA modification pathways that are important to the growth of cancer cells.

Main model(s) used Human cells and mouse cells

What will you do? Spend 3 hours in the lab each day, learning and practicing techniques such as RNA purification and gel electrophoresis.

You will attend four, 2- hour interactive workshops on topics such as confocal microscopy. These workshops will be led by scientists and specialists in the field.

Additionally, you will read and analyse a research paper and you will present it and your experiences to other students. You will also have the opportunity to network with PhD students and scientists, talk to them about their jobs and lives and find out how research is done in the lab.
About the successful student

We expect all students to be punctual, responsible, reliable, curious, and willing to listen to advice and act on feedback.

You must also be available for all of the days during the placement week.

Ideally interested in: Biology

Key skills include: Attention to detail, proactive, inquisitive

What you will need

You will need to bring

Closed-toed shoes
A positive attitude

We will provide

Lab coat
Protective eyewear
Gloves
Computer access
Free lunch at the Institute (up to £10 per day)
Transportation reimbursement (receipts required, up to £50 per week)
